APPENDIX

3. An electroluminescent device as claimed in claim 1 ~~or 2~~ wherein the metal or metal alloy has a melting point of 250 °C or less.
4. An electroluminescent device as claimed in claim 1, ~~2 or 3~~ wherein the electrode is an electrode for supplying electrons to the electroluminescent layer.
6. An electroluminescent device as claimed in claim 1, ~~2, 3 or 4~~ further comprising a relief pattern for patterning the pattern-wise ink-jet printed electrode.
7. An electroluminescent device as claimed in ~~any one of the claims 1 to 6~~ claim 1, wherein the device is a matrix display device of the passive type comprising one or more electroluminescent layers sandwiched between row electrodes and column electrodes, independently addressable electroluminescent elements being formed at crossings of row and column electrodes, wherein the row electrodes are pattern-wise ink-jet printed electrodes comprising a metal or a metal alloy.
